

LEARNING OBJECTIVES

12/4/18

DESIRED OUTCOMES

At the end of the presentation, attendees will be able to:

- differentiate between infection and poisoning related to contaminated food.
- describe the mechanisms of action associated with foodborne microorganisms and resulting signs and symptoms in affected patients.
- cite the incidence and epidemiology of foodborne illness and associated foods in the US and in LA County, which illnesses to report to LA County Public Health and how to prevent foodborne illness.
- prepare to assess cultural diversity issues in risk, incidence, prevalence, disease burden, or mortality associated with foodborne illness and/or cultural disparities in access, diagnosis at more advanced stages, or less adherence to treatment regimens.
